

Science FCAT

Vocabulary List

mass

pressure

electron

nucleus (atom)

proton

neutron

neutral

**law of conservation
of energy**

speed

air resistance

inertia

vibration

**electromagnetic
radiation**

crest

trough

amplitude

wavelength

frequency

prism

diffraction

thermal energy

convection

calorie

magnetic field

circuit

crust

erosion

radiation

conduction

convection

fossil fuel

biodiversity

nucleus (cell)

mitosis

gene

allele

dominance

recessive

homozygous

heterozygous

Punnett square

meiosis
